

# Garlic Powder - Lehsun - Allium sativum

Allium sativum · Amaryllidaceae

Vegetable powder Food grade

## 1. Product identification

|                          |                                                                                                                         |
|--------------------------|-------------------------------------------------------------------------------------------------------------------------|
| Product name             | Garlic Powder - Lehsun - Allium sativum                                                                                 |
| Botanical name           | Allium sativum (syn. Allium arenarium, Allium controversum, Allium longicuspis, Allium ophioscorodon, Allium pekinense) |
| Plant family             | Amaryllidaceae                                                                                                          |
| Common names             | Garlic, Lehsun, Lahsun, Kashmiri Lehsun, Snow Mountain Garlic, Kashmiri Garlic                                          |
| Indian / Ayurvedic names | लहसुन, रसून, వెల్‌లూల్‌తీ, ఆలూ, బೆಳ್‌లూ, لہسن                                                                           |
| Product form             | Vegetable powder                                                                                                        |
| Country of origin        | India                                                                                                                   |
| Product code (SKU base)  | 65868-PDR-ALSAT                                                                                                         |

## 2. Composition and identifiers

| INCI / COMPONENT          | FUNCTION             | CAS | EC | PROPORTION |
|---------------------------|----------------------|-----|----|------------|
| — (no INCI name assigned) | Botanical ingredient | —   | —  | —          |

INCI status: Not applicable (no cosmetic INCI listed)

Where more than one CAS number is shown, the botanical substance is registered under several CAS numbers (e.g. EINECS and TSCA variants); all refer to the same INCI name.

## 3. Manufacturing

|           |                                                                          |
|-----------|--------------------------------------------------------------------------|
| Process   | Dried and milled                                                         |
| Additives | No added colours, fragrance or preservatives unless stated on the label. |

## 4. Typical properties

|                     |                                                                           |
|---------------------|---------------------------------------------------------------------------|
| Physical state      | Solid (powder)                                                            |
| Appearance / colour | Characteristic of the plant material; may vary naturally between harvests |
| Odour               | Characteristic                                                            |

Typical values describe the product type and are not a specification. Batch-specific results (assay, moisture, microbiology, heavy metals as applicable) are given on the Certificate of Analysis, available on request.

## 5. Applications and use

|                            |                                                                                                                                     |
|----------------------------|-------------------------------------------------------------------------------------------------------------------------------------|
| <b>Suggested use level</b> | Use according to the formulation; typical inclusion in cosmetics 1–10 %, in food and supplements as permitted by local regulations. |
|----------------------------|-------------------------------------------------------------------------------------------------------------------------------------|

The formulator is responsible for confirming suitability, stability and regulatory compliance of the finished product in the intended market. Not intended for direct medicinal use.

## 6. Packaging, storage and shelf life

|                   |                                                                                                                                                                                 |
|-------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Pack sizes</b> | 225 g, 1 Kg, 2 Kg, 5 Kg, 10 Kg, 25 Kg — bulk and custom quantities on request                                                                                                   |
| <b>Storage</b>    | Store in tightly closed original containers in a cool (below 25 °C), dry, well-ventilated place, away from direct sunlight, moisture, strong odours and incompatible materials. |
| <b>Shelf life</b> | 24 months from the date of manufacture in unopened original packaging stored as recommended.                                                                                    |

## 7. Documentation and quality

|                                |                                                                                 |
|--------------------------------|---------------------------------------------------------------------------------|
| <b>Safety Data Sheet</b>       | SDS-65868-PDR-ALSAT — available for download on the product page                |
| <b>Certificate of Analysis</b> | Batch-specific COA available on request                                         |
| <b>Other documents</b>         | Allergen, IFRA, origin and other statements on request, subject to availability |
