

# Indian Frankincense Glycerin Extract - Boswellia serrata

Boswellia serrata · Burseraceae

Glycerin extract   Water-soluble   INCI listed in EU CosIng

## 1. Product identification

|                          |                                                                                   |
|--------------------------|-----------------------------------------------------------------------------------|
| Product name             | Indian Frankincense Glycerin Extract - Boswellia serrata                          |
| Botanical name           | Boswellia serrata (syn. Boswellia glabra, Boswellia hirsuta, Boswellia thurifera) |
| Plant family             | Burseraceae                                                                       |
| Common names             | Indian Frankincense, Indian Olibanum, Olibanum, Gond Kundru, Shallaki Gum, Lubaan |
| Indian / Ayurvedic names | Chira, Kundur, Luban, Salai-guggul, Shallaki, kundur luban                        |
| Product form             | Glycerin extract                                                                  |
| Country of origin        | India                                                                             |
| Product code (SKU base)  | 51899-GLY-BOSER                                                                   |

## 2. Composition and identifiers

INCI: Glycerin, Aqua, Boswellia Serrata Extract

| INCI / COMPONENT          | FUNCTION          | CAS        | EC        | PROPORTION |
|---------------------------|-------------------|------------|-----------|------------|
| Glycerin                  | Solvent           | 56-81-5    | 200-289-5 | —          |
| Aqua                      | Solvent           | 7732-18-5  | 231-791-2 | —          |
| Boswellia Serrata Extract | Botanical extract | 97952-72-2 | —         | —          |

Solvent system: Glycerin : water 75:25.

EU CosIng reference no.: 34040, 92472, 85313 · INCI status: Verified in CosIng

Where more than one CAS number is shown, the botanical substance is registered under several CAS numbers (e.g. EINECS and TSCA variants); all refer to the same INCI name.

## 3. Manufacturing

|           |                                                                          |
|-----------|--------------------------------------------------------------------------|
| Process   | Cold pressed                                                             |
| Additives | No added colours, fragrance or preservatives unless stated on the label. |

## 4. Typical properties

|                     |                                                                           |
|---------------------|---------------------------------------------------------------------------|
| Physical state      | Liquid (viscous)                                                          |
| Appearance / colour | Characteristic of the plant material; may vary naturally between harvests |
| Odour               | Characteristic                                                            |

|                    |                                                                                    |
|--------------------|------------------------------------------------------------------------------------|
| <b>Solubility</b>  | Water-soluble                                                                      |
| <b>Flash point</b> | Not flammable (glycerin–water solution); pure glycerin approx. 160 °C (closed cup) |

Typical values describe the product type and are not a specification. Batch-specific results (assay, moisture, microbiology, heavy metals as applicable) are given on the Certificate of Analysis, available on request.

## 5. Applications and use

|                                |                                                      |
|--------------------------------|------------------------------------------------------|
| <b>Applications</b>            | Incense                                              |
| <b>Markets</b>                 | Home & craft                                         |
| <b>Traditional use systems</b> | Ayurvedic                                            |
| <b>Suggested use level</b>     | Typical use level in cosmetics 1–10 % (water phase). |

The formulator is responsible for confirming suitability, stability and regulatory compliance of the finished product in the intended market. Not intended for direct medicinal use.

## 6. Packaging, storage and shelf life

|                   |                                                                                                                                                    |
|-------------------|----------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Pack sizes</b> | 225 g, 1 Kg, 5 Kg, 25 Kg — bulk and custom quantities on request                                                                                   |
| <b>Storage</b>    | Store in tightly closed containers in a cool (below 25 °C), dry place away from direct sunlight. Glycerin is hygroscopic — keep containers closed. |
| <b>Shelf life</b> | 24 months from the date of manufacture in unopened original packaging stored as recommended.                                                       |

## 7. Documentation and quality

|                                |                                                                                 |
|--------------------------------|---------------------------------------------------------------------------------|
| <b>Safety Data Sheet</b>       | SDS-51899-GLY-BOSER — available for download on the product page                |
| <b>Certificate of Analysis</b> | Batch-specific COA available on request                                         |
| <b>Other documents</b>         | Allergen, IFRA, origin and other statements on request, subject to availability |
